## Part I Analytic Number Theory, Combinatorics, and Special Sequences of Numbers and Polynomials

<b>The Mean Values of the Riemann Zeta-Function on the Critical Line</b> .....	3
Aleksandar Ivić	
<b>Explicit Bounds Concerning Non-trivial Zeros of the Riemann Zeta Function</b> .....	69
Mehdi Hassani	
<b>On the Value-Distribution of Logarithmic Derivatives of Dirichlet <math>L</math>-Functions</b> .....	79
Yasutaka Ihara and Kohji Matsumoto	
<b>Multiple Gamma Functions and Their Applications</b> .....	93
Junesang Choi	
<b>On Partition Functions of Hyperbolic Three-Geometry and Associated Hilbert Schemes</b> .....	131
A.A. Bytsenko and E. Elizalde	
<b>Families of Twisted Bernoulli Numbers, Twisted Bernoulli Polynomials, and Their Applications</b> .....	149
Yilmaz Simsek	
<b>Combinatorial Interpretation of a Generalized Basic Series</b> .....	215
A.K. Agarwal and M. Rana	
<b>Identities for Reciprocal Binomials</b> .....	227
Anthony Sofu	
<b>A Note on <math>q</math>-Stirling Numbers</b> .....	239
Mircea Merca	

## Part II Analytic Inequalities and Applications

<b>A Survey on Cauchy–Bunyakovsky–Schwarz Inequality for Power Series</b> .....	247
Alawiah Ibrahim and Silvestru Sever Dragomir	
<b>Topics in Special Functions III</b> .....	297
Glen D. Anderson, Matti Vuorinen, and Xiaohui Zhang	
<b>Completely Monotone Functions: A Digest</b> .....	347
Milan Merkle	
<b>New Applications of Superquadracity</b> .....	365
Shoshana Abramovich	
<b>Green’s Operator and Differential Forms</b> .....	397
Shusen Ding and Yuming Xing	
<b>Multidimensional Discrete Hilbert-Type Inequalities, Operators and Compositions</b> .....	429
Bicheng Yang	
<b>The Function <math>(b^x - a^x)/x</math>: Ratio’s Properties</b> .....	485
Feng Qi, Qiu-Ming Luo, and Bai-Ni Guo	
<b>On the Approximation and Bounds of the Gini Mean Difference</b> .....	495
Pietro Cerone	
<b>On Parametric Nonconvex Variational Inequalities</b> .....	517
Muhammad Aslam Noor	

## Part III Approximation of Functions and Quadratures

<b>Simultaneous Approximation for Stancu-Type Generalization of Certain Summation–Integral-Type Operators</b> .....	531
N.K. Govil and Vijay Gupta	
<b>Korovkin-Type Approximation Theorem for Functions of Two Variables Via Statistical Summability <math>(C, 1, 1)</math></b> .....	549
M. Mursaleen and S.A. Mohiuddine	
<b>Reflections on the Baker–Gammel–Wills (Padé) Conjecture</b> .....	561
Doron S. Lubinsky	
<b>Optimal Quadrature Formulas and Interpolation Splines Minimizing the Semi-Norm in the Hilbert Space <math>K_2(P_2)</math></b> .....	573
Abdullo R. Hayotov, Gradimir V. Milovanović, and Kholmat M. Shadimetov	
<b>Numerical Integration of Highly Oscillating Functions</b> .....	613
Gradimir V. Milovanović and Marija P. Stanić	

**Part IV Orthogonality, Transformations, and Applications**

<b>Asymptotic Reductions Between the Wilson Polynomials and the Lower Level Polynomials of the Askey Scheme</b> .....	653
Chelo Ferreira, José L. López, and Ester Pérez Sinusía	
<b>On a Direct Uvarov-Chihara Problem and Some Extensions</b> .....	691
K. Castillo, L. Garza, and F. Marcellán	
<b>On Especial Cases of Boas-Buck-Type Polynomial Sequences</b> .....	705
Ana F. Loureiro and S. Yakubovich	
<b>Goursat's Hypergeometric Transformations, Revisited</b> .....	721
Per W. Karlsson	
<b>Convolution Product and Differential and Integro: Differential Equations</b> .....	737
Adem Kılıçman	
<b>Orthogonally Additive: Additive Functional Equation</b> .....	759
Choonkil Park	

**Part V Special and Complex Functions and Applications**

<b>Alternating Mathieu Series, Hilbert–Eisenstein Series and Their Generalized Omega Functions</b> .....	775
Árpád Baricz, Paul L. Butzer, and Tibor K. Pogány	
<b>Properties of the Product of Modified Bessel Functions</b> .....	809
Árpád Baricz and Tibor K. Pogány	
<b>Mapping Properties of an Integral Operator Involving Bessel Functions</b> .....	821
Saurabh Porwal and Daniel Breaz	
<b>Poincaré <math>\alpha</math>-Series for Classical Schottky Groups</b> .....	827
Vladimir V. Mityushev	
<b>Inclusion Properties for Certain Classes of Meromorphic Multivalent Functions</b> .....	853
Nak Eun Cho	
<b>A Journey from Gross-Problem to Fujimoto-Condition</b> .....	865
Indrajit Lahiri and Abhijit Banerjee	
<b>Index</b> .....	879
